

Acüsta

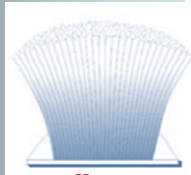

FIRST NAME IN SEALING SYSTEMS

Acüsta woven pile weatherstripping is an excellent product for draught proofing in sliding applications.

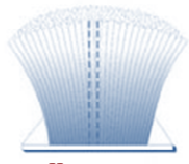

We offer three key **Acüsta** profiles:- Pile(CP), Fin Pile(CF), and Fringe (CN) series.

Windows fitted with **Acüsta** consistently achieve CLASS – “severe weather rating” during independent tests for air and water penetration.

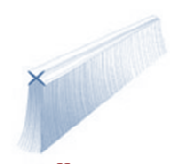

Our products are in accordance with BS 6375 and BS7101-86 and comply with the rigorous standard of the Architectural Aluminum Manufacturers Association of the USA (AAMA701.2-1974).

Acüsta
Pile [CP]

Acüsta
Fin Pile [CF]

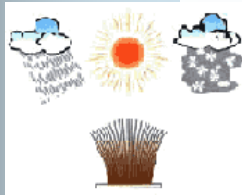

Acüsta
Fringe [CN]

Typical Applications Include

- PVC-U, aluminum and timber windows & doors
- In tumescent and smoke seals
- Draught extruder
- Insect screens and roller blinds
- Anti-rattle and dust seals

The key benefits of **Acüsta** are its low friction, weather resistant properties high strength & durability!

Weather Resistant

Polypropylene is chemically inert & compatible with all window frame materials. The yarn is extremely durable, highly resistant to abrasion, ozone and biological attack. The pile is fully siliconised & UV stabilised to minimize the effects of ultra violet light & with stand wide variations in temperature.

Durability and Efficient

Polypropylene is well suited to cope with external direct force.

Water Repellent

The woven yarn has been impregnated with silicone which provides an additional barrier against water absorption.

The standard range of colours are grey, black, brown and white.
